

The kwik frame is a durable and easy system to maintain.

Kwik™ frame

REPLACEMENT PARTS

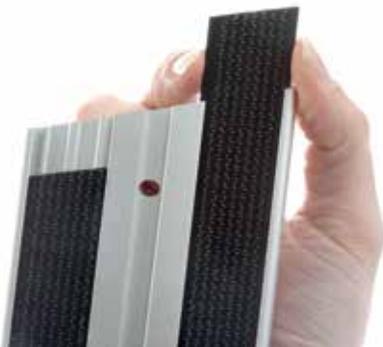

The Kwik system frames and handles are designed for professional use. They are built with the highest grade extruded aluminum and durable composites. Each composite material on the frame can be replaced should the part become damaged. Vulcanized velcro® hooks can be removed without tools for cleaning or replacement. The quick connect assembly can be replaced by removing two set screws on the underside of the aluminum channel.

FEATURES:

- High impact composites are durable and last the life of the product. Should damage occur these parts are easy to remove and replace.
- These parts are compatible with the 23 cm, 40 cm and 55cm Kwik frame.
