

Universal style fits any 5 inch wide frame on the market

value cotton dust mop

with universal backing

Our value-conscious non-heat set cotton dust mops are designed for facilities where laundering is not possible. These mops are best suited for heavy soils in industrial applications with substantial dirt loading. Ideal for contractors who want an economical solution when price is an important buying consideration. The new universal design replaces our traditional tie-on backing offering enhanced durability.

features and benefits

- Constructed with mildew resistant synthetic backing. This colorfast material is stronger and more abrasion resistant than canvas.
- Cut-end cotton can be treated for dust control and enhanced pickup.
- Universal backing will fit break away or rigid frames that are a nominal 5 inches wide.
