

Coarse red fibres move large dirt and debris on any surface.

squeegee broom

any surface, any condition

Keep your garage or workshop extra clean with this broom and squeegee duo. The all-synthetic construction allows it to thrive even in wet environments. The block is made from reclaimed polypropylene and features coarse fibres to move large dirt and debris on any surface. The integrated squeegee can be used under any weather conditions, staying flexible even in the middle of a cold Canadian winter. This broom comes fully assembled with a brace for extra durability and strength. The 60" metal handle has a foam grip for improved comfort.

sweep and squeegee

The 24" block works great in spaces of all sizes. The coarse synthetic fibres are oil and solvent resistant. The squeegee is made from a synthetic rubber and polypropylene compound which is also resistant to petrochemicals and remains functional under extreme outdoor temperatures. The strong steel brace reinforces the connection between the block and the 60" acme threaded handle. The metal handle features a comfortable foam grip to protect your hands from the heat or the cold. This broom is best suited for use outdoors or in areas like garages.

features and benefits

- Block is made from reclaimed polypropylene and can be recycled.
- Red synthetic fibres are oil and solvent resistant.
- Squeegee can be used in any weather conditions.
- Steel brace eliminates shearing stresses that wear out the threads and cause the handle to break off.
- Swivel end cap allows for easy storage.
- Foam grip for improved comfort.
