

Dynamop™ Dusting Sheets

Dynamop™ is an economical, disposable dust mop sheet that uses microscopic fibres to remove dust and dirt from hard surfaces. These fibres create an electrostatic charge to pull the dust, dander and bacteria from the floor, as well as picking up larger particles such as hair and lint.

Features and Benefits

- Uses and electrostatic charge to attract fine dust and particles
- Ideal for “one sheet per room” policies to avoid cross-contamination
- Eliminates the need for costly laundering
