

Electrastat™ Dust Mop

Designed for Durability and Launderability

Electrastat is made from a heavy nylon yarn that attracts dust without mop treatment and is exceptionally durable. Electrastat is offered in three bright colours for use in institutions where colour-coding is used. The mops feature universal boot construction for increased compatibility.

Electrastat is perfect for hospitals, schools, long term care facilities or where dust mop treatment is prohibited.

Features and Benefits

- Nylon yarn creates an electrostatic charge to trap and hold dust, no treatment required.
- Colour options for implementing colour-coding strategies.
- Universal backing is compatible with every style of frame.
- Great for hospitals, schools, and commercial buildings.

Size (in)	Blue	Green	Red
18	25018	24818	24918
24	25024	24824	24924
36	25036	24836	24936
