

Microloop™

Dust And Wet Mops

Microloop mops are made of all-synthetic yarn manufactured in Canada. This specially formulated synthetic/microfibre blend picks up 5 times its weight. The twisted 4-ply yarn has excellent tensile strength for improved launderability and durability. When laundered in a commercial facility, the service life is impressively long: the looped-end construction helps it outlast cut-end mops by 8:1.

The Microloop yarn is manufactured specifically for dry and wet mopping with just the right amount of absorbency, release and strength characteristics for general mopping applications on a wide range of floor surfaces.

Looped-end construction provides additional strength and durability.

Features And Benefits

- Microfibre digs deeper, resulting in better cleaning power than traditional mops.
- Dust mop features universal backing that fits both rigid and breakaway frames.
- Wet mop is available with either narrow or wide band.
- Tailband tape on wet mop allows for even floor coverage and eliminates tangles.

Yarn Technical Data	
Fibre	50% Synthetic / 50% Microfibre
Colour	Green And White Stripe
Ply	Dust Mop - 3, Wet Mop - 4
Break Strength	55 Lbs
Absorption	500%

Product	Size	Description	Pack
50118	18	Microloop Dust Mop	10
50124	24		
50136	36		
50148	48		

Product	Size	Band	Description	Pack
5005	Small	Narrow	Microloop Wet Mop	10
5006	Medium			
5007	Large
