

This low-cost mop can be reused when rinsed and hung to dry after use.

Sorb-X™

Spill Pickup Mop

The special material of Sorb-x's mop strands captures solvents, oils, and liquids. The mop can be quickly deployed and moved about to stop spills from spreading before absorbent socks are deployed. This material holds five times its weight and prevents liquid release before the mop is wrung out.

The low cost of this mop and its superior capillary characteristics (wicking) make this an ideal product to use on rough surfaces. Consider pairing with a 60 inch Ez-change™ colour-coded fibreglass handle for increased reach.

Features And Benefits

- Fast wicking action of this mop stops spills before they spread.
- Excellent performance on all rough surfaces.
- This is a low cost, disposable mop designed for extreme mopping conditions.
- Non-linting material offers excellent absorption.
